≥95% On Time Delivery

Overseas Market OTD ≥95%
Special Industry like Medica,
Transporation ≥99%
Urgent Orders ≤ 7 DAYS

BIG DATA IN ADV 2020

A lot of things happened, YOU will be the witness for this history .

WoWordwidely, we have CODIV and trade conflict all the year, and ADV factory facility was forced to be stopped working from JAN to late of Feb, we offically came back at March, then we were felling down in a rush production time, to full fill all the orders which have been delayed; Then since Sep we have problems related to raw material, exchanger rate and so on.

Despite all of these difficulties, we managed to mantian our operation well, not so smoothly earlier but latter half of the year business grow stronger and result in the same lever of demand as last year.

True genius resides in the capacity for the evaluation of uncertain , hazardous, and conficiting information
